Section 1: Quarterly Operations Notes

The platform processed a steady volume of documents this quarter. Most files were short text reports and memos that needed no special handling, and turnaround stayed well within target. Operators asked for clearer logs and faster startup on small servers.

The platform processed a steady volume of documents this quarter. Most files were short text reports and memos that needed no special handling, and turnaround stayed well within target. Operators asked for clearer logs and faster startup on small servers.
